## **SUNQUEST: Heatwaves in the City, Summer Holidays in the Sun – An iPhone App to Find Shade and Sunshine**

**Anticipate the heat, find the shade, and make the most of the sun.**

**Hot summer days are here — and SunQuest helps you stay one step ahead by showing exactly where the sun will be and where you'll find shade, at any time of day or year.**

The app is already trusted by over 100,000 users, with an average rating of 4.8/5 on the App Store.

**It's perfect for finding a shady spot in the city, enjoying a cool lunch on a terrace, or parking your car out of the sun for several hours.**

It's also a great travel companion: use the app to check whether your holiday accommodation faces the sun, position a tent optimally, find a terrace that's sunny in the morning and shaded in the afternoon — or capture the perfect sunset photo, thanks to precise, minute-by-minute sun position data.

**And as a bonus**, SunQuest also displays hourly weather, including the UV index throughout the day — helping users avoid the riskiest times for sun exposure or better protect themselves when heading outdoors.

Beyond its practical uses, SunQuest also sparks curiosity. It's a fun way to engage with kids, discovering together that the sun doesn't always rise in the east or set in the west. A great way to reconnect with the sky — while staying cool.

SunQuest is currently available for free on iPhone, iPad, and Mac. An Android version is coming soon.

Paid options unlock access to any location worldwide, future dates, and advanced features such as: Google Street View with solar path overlay, Solar roof energy estimation, 10-day detailed weather forecasts.

📱 **Discover it now on the App Store :**

💡 **The full-featured version is available upon request.**

## About

SUNQUEST is an app designed to provide an intuitive and reliable way to visualize the sun's path.

It's useful for both individuals and professionals for whom sunlight is essential — such as **photographers** and videographers, **solar panel installers**, **architects**, and **landscape designers**.
